

## Коды фирм, поставлявших продукцию для ВМФ США (US Navy)

Каждая американская фирма, добившаяся права поставлять продукцию для Военно-морского флота США, получала свой буквенный код, который использовался в маркировке ее продукции.

Эти флотские **коды производителей** (коды MDS) всегда начинались с буквы "С" и могли содержать от двух до четырех букв (CG - General Electric, CRV - RCA Victor, CANU - Seaboard Electric и т.д.).

Коды MDS применялись при маркировке радиоаппаратуры и вспомогательных устройств (блоков питания, телеграфных ключей и т.п.). В этих случаях марка устройства начиналась с кода MDS, например, САУ-46076, СТЕ-26003А и т.п.

Коды MDS применялись также при маркировке радиоламп в объединенной армейско-флотской системе JAN. Здесь код MDS размещался сразу же после букв "JAN", например, JAN-CTL-6L6G. При сокращенной форме маркировки часть кода MDS (без буквы "С") размещалась сразу же после буквы "J", например, JTL-6L6G.

Полного перечня кодов MDS нам пока обнаружить не удалось. Поэтому мы решили свести воедино разрозненные сведения о таких кодах, дополнив их информацией из собственной коллекции, особенно по производителям радиоламп.

И хотя в наших списках всего 200 с небольшим кодов (а их, судя по всему, было много больше тысячи), информация из этих списков уже не раз доказала свою полезность при изучении образцов оборудования времен Второй Мировой войны.

Ниже приводятся два списка: первый – в алфавитном порядке кодов MDS, а второй – в алфавитном порядке названий фирм-поставщиков.

Будем благодарны, если вы сможете предоставить нам дополнительные варианты кодов MDS и названия фирм, которым эти коды были присвоены, чтобы сделать наши списки еще более полными. В качестве подтверждения просим присылать фотографии радиоламп или этикеток аппаратуры, где видны названия фирм-производителей и присвоенные им коды MDS.
